## Instructions

^ COLLAPSE ^

Visit w3schools and go to the Java Tutorial section: <https://my-learning.w3schools.com/tutorial/java>

Complete the following readings

Classes Lessons 11.7 - 11.14, 11.16 - 11.20, 11.22 - 11.26

Java Quiz (on the tutorial page)

## Guide:

Make sure you're in the main branch locally and ``git pull origin main`` any pending changes

Make a new branch per the recommended branch name below (`git checkout -b ...`)

Fill in the items in the worksheet below (save as often as necessary)

Once finished, export the worksheet

Add the output file to any location of your choice in your repository folder (i.e., a Module2 folder)

Check that git sees it via ``git status``

If everything is good, continue to submit

Track the file(s) via ``git add``

Commit the changes via ``git commit`` (don't forget the commit message)

Push the changes to GitHub via ``git push`` (don't forget to refer to the proper branch)

Create a pull request from the homework related branch to main (i.e., main <- "homework branch")

Open and complete the merge of the pull request (it should turn purple)

Locally checkout main and pull the latest changes (to prepare for future work)

Take the same output file and upload it to Canvas

\*This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better

\*Remember, the github process of these files are encouragement for your tracking of your progress

Response:

I am pretty confident with java now. Going over everything I just remembered it all its just some small stuff that I forget but the IDE plugins just tell me when I do something wrong at this point and I'm really just having trouble making enums, mostly because I forget to make them in the first place. I am pretty confident especially after scoring decent

on the quiz, I wish the quiz went more into harder topics like enums and didn't only ask the most bare bones questions on inheritance and exceptions.
